

Recruitment of Interim Systems Consultant Formaplex Ltd.

Brief

Formaplex is private equity backed and provides world-class manufacturing solutions. With extensive capabilities and a very experienced team at Formaplex, they are a preferred supplier for the design and manufacture of injection-mould tooling for key Tier 1 companies supporting the high volume automotive industry throughout Europe. The company has enjoyed working with the F1, Motorsport and aerospace industries since its foundation in 2001. As a very experienced and dependable supplier, they operate 24/7 to provide the manufacture of master patterns, components, tooling for composite part manufacture, and finish machined composite parts in line with the high-tech requirements demanded from these industries.

Response & Outcome

With the recent appointment of a new CFO, Formaplex needed to drive greater efficiencies from its ERP system. The CFO used Chilworth Partnership exclusively to source an experienced systems consultant who also happened to be a big four qualified accountant with a career gained both in senior level finance positions and systems consultancy.

“Chilworth Partnership identified for me an experienced interim financial systems consultant to help us implement a new ERP system. I find their approach consultative and have developed a very good relationship with the business since its inception in 2010”.

Peter Fredericks

CFO, Formaplex Ltd.
